Starbucks Coffee, Fastbytes - Northgate Cyberzone,
Northgate Ave, Alabang, Muntinlupa, 1781 Metro Manila

Dear Mr. Darlucio,

Good day!

We are BS Computer Science students from the Institute of Information and Computing Sciences of the University of Santo Tomas. As part of our final requirements for the course Mobile Programming, we are tasked to develop a mobile Android application that would address a problem statement based on observed gaps. Our proposed application, **Home Brew**, is a collection of beverage recipes which aims to provide recipes with ingredients commonly used within households.

As part of the potential admins for our application, may we ask for your availability to be an admin of the said proposal to validate the recipes that would be included in the application. In line with this, may we also request for your evaluation in a mock-up prototype of our proposed application.

Let us know your input by reaching me through my email address, louisezienne.bonsol.iics@ust.edu.ph. Should there be no revisions needed for the design, may we request for your affixed signature in this letter to signify your approval of the design.

Please find attached to this letter a copy of our mock-up prototype.

Thank you and hoping your consideration.

Sincerely yours,

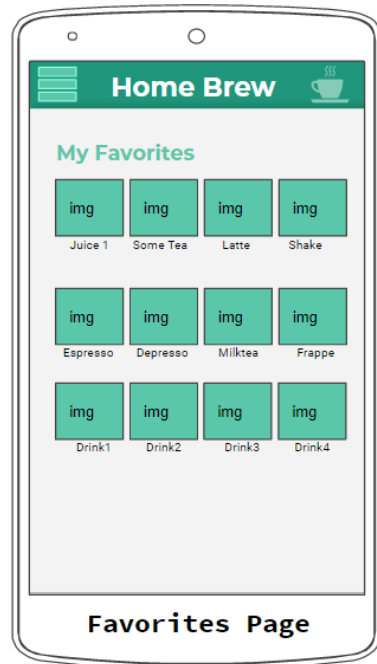

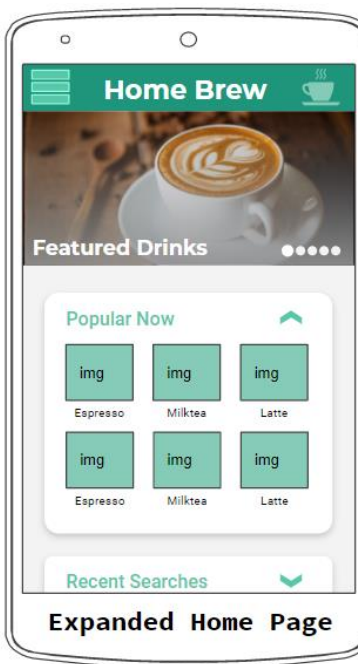

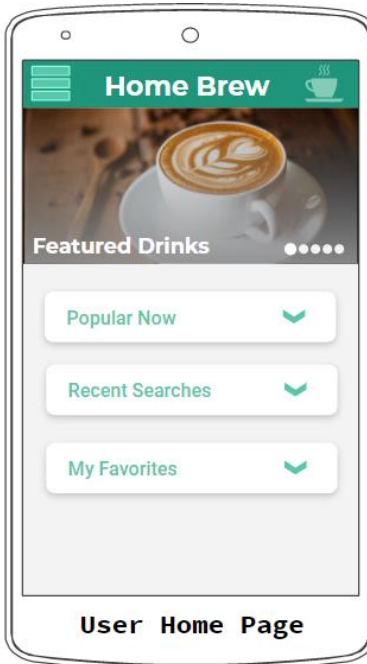

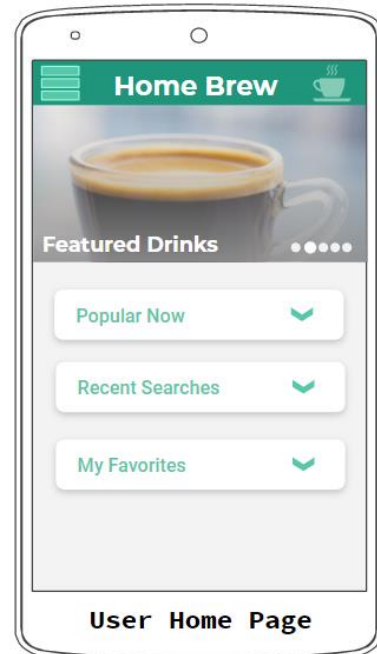

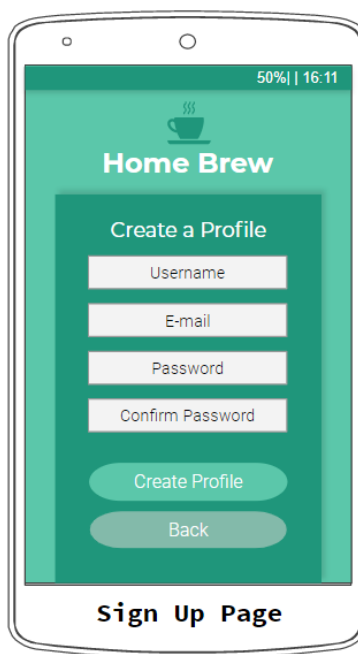

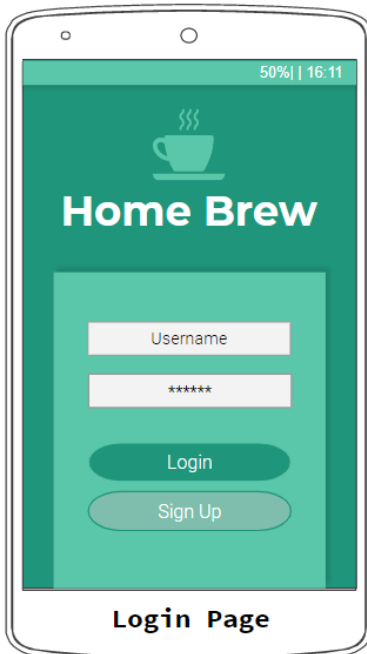

Louise Zienne A. Bonsol
Project Manager, ICS26011-3CSB
